

SADIE ROBINSON.
Pretty Girl Suffered From Nervousness and Pelvic Catarrh—Found Quick Relief in a Few Days.

NERVOUSNESS AND WEAKNESS CURED BY PE-RU-NA.

Miss Sadie Robinson, 4 Rand street, Malden, Mass., writes:

"Peruna was recommended to me about a year ago as an excellent remedy for the troubles peculiar to our sex, and as I found that all that was said of this medicine was true, I am pleased to endorse it."

"I began to use it about seven months ago for weakness and nervousness, caused from overwork and sleeplessness, and found that in a few days I began to grow strong, my appetite increased and I began to sleep better, consequently my nervousness passed away and the weakness in the pelvic organs soon disappeared and I have been well and strong ever since."

GIVING IN.

It is Frequently Worth While to Admit Our Own Fault.

"But don't you think," Doctor Meredith said, gently, "that we sometimes win our greatest victories just by giving in?"

"It's the principle of the thing," Miss Mary insisted. "That woman means to be disagreeable. If I let her ride over me in little things—"

"Maybe she's only tired—too tired to take the longer way round the grass to the well. And as for having picked that daffodil—did you never feel hungry for a flower, or the sight and touch of some beautiful thing?"

"But I wouldn't steal it!"

"Steal it?" repeated the old man, his eyes on the wind-tossed blossoms beyond the gravel walk. "Steal it from whom? It was God's earth and air, God's rain and sunshine that brought it into being. That daffodil may have meant much to your neighbor—"

"But it's the principle of the thing. Surely you don't advocate—"

"Miss Mary," the doctor interposed, gently, "I've lived almost twice as long as you have, and I've come to believe that there is only one indispensable principle—and that is love. We can never really know the pain and weariness of another's life. Only love can understand—a little."

It was the next afternoon, when Miss Mary was weeding near the whitewashed fence, that voices sounded on the other side. Was it Doctor Meredith's? Yes, and "that woman's."

"It has done her a world of good—just that one blossom. They used to grow in our old home, and it's been years since she's even smelled one. I meant to ask the lady for it, but she seemed so kind of—hard—"

"But she isn't, when you really know her," the doctor said, and tears of gratitude sprang to Miss Mary's eyes. "Well," the other returned, "we'd had some words about the path, and I'd made up my mind not to speak to her again, and—"

"And you wouldn't give in?" The doctor shook his head with a wistful smile in his kind eyes.

"My sister said I was wrong," the other returned. "She says as we near the border-land, things like that don't seem worth noticing. Oh, if you knew how that flower has helped the time to pass with my sister! It has almost made me want to go to the lady and thank her, but of course she wouldn't understand; she'd only think I was giving in to get more, and so—"

On the other side of the fence Miss Mary was gathering a great cluster of golden blossom. There was a new light in her eyes. Was it from the brightness of the blossoms before her or the radiance of the joy of "giving in"?—Youth's Companion.

WHY EYESIGHT FAILS

INFERIOR ARTIFICIAL LIGHT FREQUENTLY THE CAUSE.

Illuminant of the Past, One and All, Have Serious Defects—Acetylene Gas, With Its Clear, Unwavering, Yet Soft Flame Cannot Hurt the Eyes.

New York, June 20.—No one can go into our schools or meet a group of children on the street without noticing how large a number of them wear spectacles. The proportion seems to increase yearly, and there are many more who ought to wear glasses. The experience of one teacher might be duplicated by the score. She knew Alice was inattentive and she thought she was unusually stupid. She said so to the principal and sent a note to the mother, requesting that the child be helped at home if she wished her to keep up with her class. One day after a blackboard explanation, the teacher called upon the child and found that she had not seen what had been written. She was kept after school and by dint of much sympathetic questioning Miss C. found that Alice had never been able to see what was put on the board and that her head had ached so often and so hard that she frequently failed to hear what was said.

Such a condition may be caused by lack of proper food, but in our American homes it is usually due to the poor quality of the artificial light. The yellow, insufficient light of the ordinary kerosene lamp, with its smoky chimney, is about as bad for the eyes as can be imagined. The flickering light from a coal gas jet is but little better, and even the electric light, brilliant as it usually is, has an unsteadiness due to variations in power, and a glare peculiarly trying to the delicate nerves of sight. The comparatively new illuminant acetylene gas produces as nearly perfect an artificial light as has yet been found. It gives a clear white, unwavering light, very brilliant, yet perfectly soft, and so nearly like the rays of the sun that even colors appear as in daylight.

Fortunately, acetylene is very easily and cheaply produced, and the simple apparatus necessary can be purchased and installed in any home at a very moderate cost, and the acetylene can be piped to convenient points in the house where a light is needed. It is then lighted and extinguished and used exactly like common city gas.

Acetylene is rapidly coming into common use in homes, churches, schools and institutions of all kinds, and it is reasonable to expect that as its use in the home increases, there will be fewer defective eyes, particularly among children. Poor eyesight and the many ills resulting therefrom will undoubtedly be much reduced by the use of this new illuminant.

ALL DONE OUT.

Veteran Joshua Heller, of 706 South Walnut street, Urbana, Ill., says: "In the fall of 1890, after taking Doan's Kidney Pills I told the readers of this paper that they had relieved me of kidney trouble, disposed of a lame back with pain across my loins and beneath the shoulder blades. During the interval which has elapsed I have had occasion to resort to Doan's Kidney Pills when I noticed warnings of an attack. On each and every occasion the results obtained were just as satisfactory as when the pills were first brought to my notice. I just as emphatically endorse the preparation to-day as I did over two years ago."
